EXPERIENCE

UX Design Intern — AMD
Sep 2019 to Dec 2019 — Markham, ON

Created a high fidelity prototype for Radeon Software: Adrenalin 2020, AMD's core device driver and utility software package for graphics cards and advanced processing units

Conducted usability testing of Radeon Software prototype, ensuring intuitive information architecture and navigation

Initialized Radeon Software's first design system and created relevant desktop screens and overlays for visual coherence

Product Design Intern — TD Lab
Sep 2018 to Dec 2018 — Kitchener, ON

Led the design and product strategy of an app aiding Canadian newcomers in the immigration process by educating them on cultural differences between their home country and Canada

Presented fully developed prototype to TD Innovation Council EVP and SVPs for advancement into commercialization

UI/UX Design Intern — Royal Bank of Canada
Jan 2018 to Apr 2018 — Toronto, ON

Redesigned and launched an internal wire transfer app, resulted in a 35% increase in task efficiency

Organized and facilitated design thinking workshops and conferences for multidisciplinary teams and project stakeholders

PROJECTS

Reframe

Designed an app that utilizes the framing effect to positively influence how individuals perceive fitness goals and workout routines, fostering a sense of attainability and improving motivation and accountability
